~~Explanation Thoughts~~

A thought is an electrochemical event taking place in your nerve cells producing a cascade of physiological changes. The article "How Your Thoughts Program Your Cells"

Get Free Anatomy

explains it this way:
There are thousands upon thousands of receptors on each cell in our body. Each receptor is specific to one peptide, or protein.

~~Nkemakolam, Joel /
Meet the Teacher~~

The idea of deeper levels of information processing was developed and extensively studied by famous Austrian psychologist Sigmund Freud (1856 – 1939) who introduced the 3 level

Get Free Anatomy

mind model.

According to his model, the mind could be divided into following levels:

Three-level mind model
Conscious – defines all thoughts and actions within our awareness.
