This volume of the Handbook of Usability and User Experience (UX) presents research and case studies used to design products, systems and environments with good usability and consequent acceptance, pleasure in use, good user experience, and understanding of human interaction issues with products and systems for their improvement. The book presents concepts and perspectives of UX; it also discusses methods and tools that use requirements analysis activity elicitation, recording, and analysis to guarantee a good user experience. In addition, it introduces usability and UX in the automotive industry, usability and UX in a digital interface, game design and digital media, usability and UX in fashion design, and some case studies on usability and UX in various contexts in product design. We hope that this second volume will be helpful to a larger number of professionals, students and practitioners who strive to incorporate usability and UX principles and knowledge in a variety of applications. We trust that the knowledge presented in this volume will ultimately lead to an increased appreciation of the benefits of usability and incorporate the principles of usability and UX knowledge to improve the quality, effectiveness, and efficiency of everyday consumer products, systems, and environments.

Providing a comprehensive overview of hot stamping (also known as " press hardening "), this book examines all essential aspects of this innovative metal forming method, and explores its various uses. It investigates hot stamping from both technological and business perspectives, and outlines potential future developments. Individual chapters explore topics such as the history of hot stamping, the state of the art, materials and processes employed, and how hot stamping is currently being used in the automotive industry to create ultra-high-strength steel components. Drawing on experience and expertise gathered from academia and industry worldwide, the book offers an accessible resource for a broad readership including students, researchers, vehicle manufacturers and metal forming companies.

Today, some suppliers have grown increasingly powerful and in certain cases, earn revenues that rival or even exceed that of their automaker clients. In the pre-globalisation period, automakers wielded absolute power over their significantly smaller suppliers. This book reveals the upending of this relationship, with the gradual shift in the balance of power from automakers to their suppliers in this era of globalisation. The book examines how suppliers in the global tyres, seats, constant velocity joints (hereafter 'CVJs'), braking systems and automotive semiconductor industries have evolved into powerful oligopolies through a mix of acquisition and organic growth strategies. It also highlights how joint ventures could be strategically deployed as springboards to acquisition, as they enable firms to familiarise themselves with their partners ' markets and operations. Moreover, the book analyses the disruption stirred by the entry of well-resourced technology titans into this industry and their inevitable clash with the traditional incumbents. This book is an invaluable reference for anyone interested in learning more about the automakers ' and now their suppliers ' relentless quest to create market-dominating intelligent driving systems.

Thermal processes are key manufacturing steps in producing durable and useful products, with solidification, welding, heat treating, and surface engineering being primary steps. These papers represent the latest state-of-the-art in thermal process modeling. The breadth of topics covers the depth of the industry.

All organizations must cope with future uncertainties. These uncertainties affect the strategic choices they make. They must commit scarce organizational resources to future outcomes which they have little assurance will come into being. Marcus explores how decision makers in the energy industry made choices in the face of such uncertainties, specifically examining two major uncertainties they confronted in the 2012-2018 period - price volatility and climate change. Marcus tells the story of how different companies in the integrated oil and natural gas sector and in the motor vehicle sector responded to these uncertainties. In the face of these challenges, companies in the energy industry hedged their bets by staking out paradoxical or contrasting positions. On the one hand, they focused on capturing as much gain as they could from the world's current dependence on fossil fuels and on the other hand they made preparations for a future in which fossil fuels might not be the world's dominant energy source.

A Globe and Mail bestseller! * " Dr. Phil. " Canada ' s best-known automotive expert, and George Iny walk you through another year of car buying. After almost fifty years and two million copies sold, Phil Edmonston has a co-pilot for the Lemon-Aid Guide — George Iny, along with the editors of the Automobile Protection Association. The 2018 Lemon-Aid features comprehensive reviews of the best and worst vehicles sold since 2007. You ' ll find tips on the " art of complaining " to resolve your vehicular woes and strategies to ensure you don ' t get squeezed in the dealer ' s business office after you ' ve agreed on a price and let your guard down. And to make sure you receive compensation where it ' s due, Lemon-Aid ' s unique secret warranties round-up covers manufacturer extended warranties for performance defects. Lemon-Aid is an essential guide for careful buyers and long-time gearheads (who may not know as much as they think).

An insightful, real-world look at the skills today's global leadership demands Leading Across Borders is the leadership guide for the new business environment. The world's economic center of gravity is shifting at a rapid pace – huge emerging economies have already emerged. As businesses operate in an increasingly global context, the most successful leaders are able to see through the eyes of others and to hear the voices of customers and colleagues from around the world. They build their own personal networks, navigate differences, and work effectively across new borders – both the physical borders between countries and the limits of old leadership paradigms. This book features direct input from people in critical roles around the world, advice based on deep practical experience, and new data that identifies the distinctive challenges of leading in an environment becoming more thoroughly interdependent every day. There is valuable advice for anyone taking on a global leadership role. You'll find strategies and tools for working across cultures, leading inclusively, running a matrix team, innovating, integrating an acquisition, and making tough ethical choices. Each chapter challenges established leadership models and shares hard-won expertise in dealing effectively with a changing reality that includes both fast-growth and slow-growth markets. You will learn how to serve more numerous stakeholders and to achieve your goals in a complex organizational structure without having direct lines of authority. This insightful guide helps you work more effectively at the self, team, and organizational levels, so you can get things done and grow your business. The increasing importance of China, India, Brazil, Indonesia, Turkey, and other developing economies has opened the world of business leadership far beyond our own borders. This book gives you a framework for coordinating it all, and being the leader your organization needs. Operate insightfully at the personal level in order to better lead others Shape, motivate, and drive your global team to exceptional performance Navigate differences in culture, language, economics, and more Exercise your vision, influence, and expertise to lead your organization forward The trend toward global leadership has emerged full-blown amidst the rising global economy. Today's leadership must understand how to work effectively and efficiently across a variety of contexts. Leading Across Borders provides a roadmap to the new leadership paradigm, helping you expand your own skillset and create forward momentum.
