Cameron DL high-pressure annular BOPs allow reliable performance in a shorter height and lighter weight than comparable annular BOPs. The unique design of our DL BOP does not require wellbore assist. The annular can close on drillpipe or large tubulars without reducing operating pressure, which minimizes risk of indention or damage to casing.

DL Annular BOP | Schlumberger

Field-proven designs to fit your desired drilling applications. Annular BOPs can contain wellbore pressure and seal the well when required by closing on the pipe in the borehole. They are equally effective if there is no pipe in the wellbore. Cameron provides designs for onshore, offshore, and subsea applications.

Annular BOPs | Schlumberger

The Cameron ram-type blowout preventer was the first successful blowout preventer (BOP) for oil wells. It was developed by James S. Abercrombie and Harry S. Cameron in 1922. The device was issued U.S. Patent 1,569,247 on January 12, 1926. The blowout preventer was designated as a Mechanical Engineering Landmark in 2003. History

The ram BOP was invented by James Smither Abercrombie and Harry S. Cameron in 1922, and was brought to market in 1924 by Cameron Iron Works.. A ram-type BOP is similar in operation to a gate valve, but uses a pair of opposing steel plungers, rams.The rams extend toward the center of the wellbore to restrict flow or retract open in order to permit flow.
