## *Chapter 18: Acids and Bases - FCPS*

Acids and bases are important components in household products, industrial processes, and in environmental and biological systems. As shown in OWL Activity 16.1, many of the items you might find in your home are acids and bases. We begin our study of acids and bases where we left off in Chapter 5, with the Arrhenius acid and base definitions.

## *CHAPTER 16: Acids and Bases*

There are 20 amino acids, but only 4 nucleotide bases in DNA. That means it takes at least 3 nucleotides to code for one amino acid, hence a codon (three amino acids). The code is read as an RNA code, 5' to 3'.
