In essence, the Stabilized Earth pathway could be conceptualized as a regime of the Earth System in which humanity plays an active planetary stewardship role in maintaining a state intermediate between the glacial–interglacial limit cycle of the Late Quaternary and a Hothouse Earth . We emphasize that Stabilized Earth is not an intrinsic state of the Earth System but rather, one in which humanity commits to a pathway of ongoing management of its relationship with the rest of the Earth System.

Trajectories of the Earth System in the Anthropocene | PNAS

The Earth Sustaining Sciences Institute with their partner Institutes deliver solutions that appreciate ecological, environmental, community, industry and government shared success advancement and ecosocietal prosperity through multi-dimensional applied sciences based societally supporting systems. The focus is forward thinking 'greed free agreement' 'shared success partnerships' delivering intergenerationally advantageous solutions.

Competence in general knowledge about the Earth and environmental sciences will be assessed by a written examination taken after the end of the second semester. The thesis advisor, in concert with the E&ES faculty, will construct several questions. The student will then have two days to answer these questions.
