ALERT: Before you purchase, check with your instructor or review your course syllabus to ensure that you select the correct ISBN. Several versions of Pearson's MyLab & Mastering products exist for each title, including customized versions for individual schools, and registrations are not transferable. In addition, you may need a CourseID, provided by your instructor, to register for and use Pearson's MyLab & Mastering products. Packages Access codes for Pearson's MyLab & Mastering products may not be included when purchasing or renting from companies other than Pearson; check with the seller before completing your purchase. Used or rental books If you rent or purchase a used book with an access code, the access code may have been redeemed previously and you may have to purchase a new access code. Access codes Access codes that are purchased from sellers other than Pearson carry a higher risk of being either the wrong ISBN or a previously redeemed code. Check with the seller prior to purchase. --This book educates students to become intelligent consumers of educational research and introduces basic research principles to those who may eventually use research in their work. Principles for conducting research and criteria for evaluating its overall credibility are presented in a concise manner, with numerous excerpts from published studies, to enable students to learn to read, understand, and evaluate research, and judge the usefulness of the findings for educational practice. There is extensive use of aides to facilitate student learning, including chapter objectives, roadmaps and concept maps, study questions, consumer tips, over 150 examples from published articles (also includes full length articles), and author reflections. The Sixth Edition includes a more extensive presentation of experimental and quasi-experimental design, consistent with the current emphasis on conducting "scientific research," qualitative data analysis, effect size, and two new chapters devoted to mixed-method studies and action research.

Fundamentals of Educational Research succeeds in cutting through the complexities of research to give the novice reader a sound basis to define, develop, and conduct study, while providing insights for even the accomplished reader. This best-selling book is of value to all social researchers, but in particular to upper-level undergraduate and graduate students as well as researchers employed in private industry, management and government agencies. Anderson discusses the research process and offers a wealth of information on how to define a research problem, plan a study, develop a research framework, collect the data, analyse it and write it into a credible paper or thesis. He has captured the essential components of the research process in a book that balances the quantitative and qualitative perspectives through both the academic and consulting research traditions.

Teachers are bombarded with advice about how to teach. The Fundamentals of Teaching cuts through the confusion by synthesizing the key findings from education research and neuroscience to give an authoritative guide. It reveals how learning happens, which methods work best and how to improve any students' learning. Using a tried-and-tested, Five-Step model for applying the methods effectively in the classroom, Mike Bell shows how you can improve learning and eliminate time-consuming, low-effect practices that increase stress and workload. He includes case studies from teachers working across different subjects and age groups which model practical strategies for: Prior Knowledge Presenting new material Setting challenging tasks Feedback and improvement Repetition and consolidation. This powerful resource is highly recommended for all teachers, school leaders and trainee teachers who want to benefit from the most effective methods in their classrooms.

• Provides step-by-step instructions for students who will be writing their first research proposal in the social and behavioral sciences. • Each major section is divided into short topics. For each topic, students complete an exercise that leads them toward the goal of preparing a proposal. • Numerous examples throughout the book make the recommendations for proposal writing come alive. • The model proposals at the end of the book illustrate proposal writing and provide material for classroom discussions. • Provides concrete guidance for students who will be writing proposals for both quantitative and qualitative research. • The structure of this book enables students to work independently with confidence while writing the first drafts of their proposals. • All steps in proposal writing are clearly described and illustrated. • Ideal for use in: • research methods classes where students write a proposal as a term project, • thesis/dissertation preparation classes, • senior research seminars where proposing and conducting research is a culminating undergraduate activity, and • any graduate-level seminar in which the instructor wants to incorporate a project that will engage students in critical thinking about the content area. • Written by our best-selling author, Mildred L. Patten. Your students will appreciate her clear and informative style.

This user-friendly text takes a learn-by-doing approach to exploring research design issues in education and psychology, offering evenhanded coverage of quantitative, qualitative, mixed-methods, and single-case designs. Readers learn the basics of different methods and steps for critically examining any study's design, data, and conclusions, using sample peer-reviewed journal articles as practice opportunities. The text is unique in featuring full chapters on survey methods, evaluation, reliability and validity, action research, and research syntheses. Pedagogical Features Include: • An exemplar journal article at the end of each methods chapter, together with questions and activities for critiquing it (including, where applicable, checklist forms to identify threats to internal and external validity), plus lists of additional research examples. • Research example boxes showing how studies are designed to address particular research questions. • In every chapter: numbered chapter objectives, bulleted summaries, subheadings written as questions, a running glossary, and end-of-chapter discussion questions. • Electronic Instructor's Resource Manual with Test Bank, provided separately--includes chapter outlines; answers to exercises, discussion questions, and illustrative example questions; and PowerPoints.
