**Engineering Drawing Of A Lawn Mower**  
An engineering drawing is a type of technical drawing that is used to convey information about an object. A common use is to specify the geometry necessary for the construction of a component and is called a detail drawing. Usually, a number of drawings are necessary to completely specify even a simple component. The drawings are linked together by a master drawing or assembly drawing which gives the drawing numbers of the subsequent detailed components, quantities required, construction materia

**Engineering drawing - Wikipedia**  
Engineering drawings are defined as those drawings that communicate the requirements for the manufacture of the end-product items, their assembly, and their installation in the end product. The engineering drawings prepared by GSFC design personnel or contractors on GSFC

**ENGINEERING DRAWING STANDARDS MANUAL**  
Anatomy of a Drawing. A generic engineering drawing can be divided into the following five major areas or parts. 1. Title block 2. Grid system 3. Revision block 4. Notes and legends 5. **Engineering Drawing Of A Lawn Mower**  
■ Engineering drawings should be unambiguous and clear. For any part of a component there must be only one interpretation. If there is more than one interpretation or indeed there is doubt or fuzziness within the one interpretation, the drawing is incomplete because it will not be a true specification. ■ The drawing must be complete.
