Climate Change | United Nations

Climate change is the long-term alteration of temperature and typical weather patterns in a place. Climate change could refer to a particular location or the planet as a whole. C limate change may cause weather patterns to be less predictable.

Climate Change | National Geographic Society

Turning Knowledge into Action So what is the way forward? Developed nations could act unilaterally and cut emissions without any commitment from countries like China, India, Brazil, Mexico, or Malaysia, but at a time of intense economic competition and rising concern over national security, this is a risk that few nations are likely to accept.

Turning Knowledge into Action | Global Climate Change ...

Global climate change has already resulted in a wide range of impacts across every region of the country and many sectors of the economy that are expected to grow in the coming decades. The Fourth National Climate Assessment (NCA4), developed by the U.S. Global Change Research Program (USGCRP), is a state-of-the-science synthesis of climate knowledge, impacts, and trends across U.S. regions and sectors to inform.

Understand | GlobalChange.gov

Scientific evidence for warming of the climate system is unequivocal. The current warming trend is of particular significance because most of it is extremely likely (greater than 95% probability) to be the result of human activity since the mid-20 th century and proceeding at a rate that is unprecedented over decades to millennia. 1
