This book is a textbook for Urban/Community Forestry courses and a handbook for Shade Tree Commissions, tree wardens, State and National Forestry Services, and professional societies. It is the most complete text in this field because it addresses both culture and management, and the chapters have been written by experts who are active practitioners. The book provides observations and examples relevant to every urban center in the U.S. and elsewhere.

□A book for children from 8 to 80. I love the humanity of this story and how one man's efforts can change the future for so many. It's a real message of hope.□ Michael Morpurgo Discover this beloved masterpiece of nature writing that is a hymn to creation and to the power of the individual to do their bit to change the world for the better. In 1910, while hiking through the wild lavender in a wind-swept, desolate valley in Provence, a man comes across a shepherd called Elzéard Bouffier. Staying with him, he watches Elzéard sorting and then planting hundreds of acorns as he walks through the wilderness. Ten years later, after surviving the First World War, he visits the shepherd again and sees the young forest he has created spreading slowly over the valley. Elzéard's solitary, silent work continues and the narrator returns year after year to see the miracle he is gradually creating: a verdant, green landscape that is a testament to one man's creative instinct. A beautiful story of hope, survival and selflessness, The

Man Who Planted Trees resonates as strongly with readers today as when it was first published.

Given their diversity and versatility, it is surprising that palms are underutilized in landscapes and gardens, even in tropical climates. Several reasons account for this, including misconceptions about the plants' growing requirements and unfamiliarity with their ornamental qualities. This pocket guide remedies both problems. It unlocks the keys to successfully growing 200 of the most common and easily obtainable palm species and hybrids, and it highlights botanical characteristics that are of interest to gardeners and landscapers. Each description includes details of trunk, crownshaft, leaf, flower, and fruit to assist in plant identification and selection. The extensive cultivation notes include details of mature tree size, cold hardiness, and light, soil, and water requirements. Suggestions for using the plants indoors and out will help even novice gardeners know where to start, and succinct information on seed germination will assist anyone who wants to grow palms from seed. Illustrated with more than 300 color photographs.
