Anyone interested in the inner reaches of the mind, the greater structure of the cosmos, and the spiritual evolution of humanity will find this book an informed and delightful read. Bentov explains the Kabbalistic principles of number and sound, the meaning of cosmic symbols, and ultimately, shows that the universe and thought are inseparable.

In his exciting and original view of the universe, Itzhak Bentov has provided a new perspective on human consciousness and its limitless possibilities. Widely known and loved for his delightful humor and imagination, Bentov explains the familiar world of phenomena with perceptions that are as lucid as they are thrilling. He gives us a provocative picture of ourselves in an expanded, conscious, holistic universe.

Looks at the structure and origins of the universe and discusses the role of the Kabbalistic principles of number and sound

Sharona Ben-Tov Muir discovered after the death of her father, inventor and New Age guru Itzhak Bentov, that he had created Israel ' s first rocket. A secret group of scientists working in a rooftop shed, the " Science Corps, " of which he was a part, invented weapons during Israel ' s war of independence and later

developed Israel ' s nuclear resources and other major scientific projects. Bentov, however, settled in Boston and made his fortune with such medical inventions as a cardiac catheter, which he created in his home laboratory, where Muir played as a child. Haunted by the question of why her father had never discussed his past, Muir traveled to Israel to find the Corps. Through her own memories and the memories they share, Muir comes to know the brilliant, impassioned, and creative young Bentov as he demonstrates his latest invention for her, takes her canoeing, and reveals his thoughts about consciousness and the cosmos. Muir elegantly evokes the hubbub of Jerusalem streets, the wartime adventures of her hosts, and the inner lives of Israelis. The resulting story of invention and self-invention, of the Corps ' s wartime experience as told for the first time, and of a deep, abiding love between father and daughter is an incandescent memoir. The author provides a new preface for this new Bison Books edition.

How can we rethink teaching practices to include and engage the whole student? What would student experience look like if we integrated silence and feeling with empirical analysis? *Tuning the Student Mind* is the story of one teacher's attempt to answer these questions by creating an innovative college course that marries the spiritual and the theoretical, integrating meditation and self-reflection with more conventional academic curriculum. The book follows Molly Beauregard and her students on their intellectual and spiritual journey over the course of a semester in her class, "Consciousness, Creativity, and Identity." Interweaving personal stories, student writing, and Beauregard's responses, along with recommendations for further reading and a research appendix, it makes the case for the transformative power of consciousness-centered education. Written in a warm, engaging voice that reflects Beauregard's teaching style, *Tuning the Student Mind* provides an accessible, step-by-step template for other educators, while inviting readers more broadly to reconnect with the joy of learning in and beyond the classroom.

Have you ever tried to wrap your head around quantum physics? Have you ever tried to comprehend concepts of time and space that have been popularized by the promoters of the "new physics" and various eastern teachers? If you have, chances are either that your eyes glazed over or you felt as if your head might explode at any moment. Here for the first time, the concepts that have been propounded by the great thinkers and teachers of the twentieth century are made accessible in an illustrated guide. More importantly, this material is presented in a way that is non-threatening and fun. Using simple and delightful illustrations throughout, *Favour*, explores: The paradigm shift that has occurred, whether we are ready or not. How quantum physics and the new technology has challenged our experience of time and space. How the spiritual thought of East and West have melded. The relationship of self to oneness, of form to emptiness.

From its arrival on earth to the vast areas it traverses before emptying into the sea, water holds all the knowledge and experience it has acquired. As phenomenal as it may seem, water carries its whole history, just as we carry ours. It carries secrets, too. In *The Secret Life of Water*, bestselling author Masaru Emoto guides us along water's remarkable journey through our planet and continues his work to reveal water's secret life to humankind. He shows how we can apply its wisdom to our own lives, and how, by learning to respect and appreciate water, we can better confront the challenges that face the twenty-first century—and rejuvenate the planet.

The Message of a Master is the story of a seemingly miraculous change that takes place in a man after he meets a true master of life. He learns, and shares with us, teachings that allow him to develop his powers so that he can accomplish anything he desires.
