Manual handling should be avoided where possible. If it cannot be avoided, then any risk assessment must identify potential dangers and the employer must take steps to reduce the risk of injury. Contact us on 08008 101010 to see how we can help you in such a claim.

Manual handling injuries account for the majority of accidents at work. Manual Handling Claims is designed to assist the practitioner in understanding the application of both common law and statutory duties to this specialised area of work.Containing concise but comprehensive analysis on the development of the law, an overview of manual handling injuries generally as well as in depth coverage of the Manual Handling Operations Regulations 1992 themselves, it provides the necessary information for all levels of personal injury practitioner especially given that essential appendices including the MHOR and the HSE Guidance are included.

This is the standard reference work for general damages in personal injury claims, and essential reading for all those involved in the area of personal injury. The Guidelines are designed to provide a clear and logical framework for the assessment of general damages while leaving the discretion of the assessor unfettered, since every case must depend to a degree on its own facts. They provide an invaluable guide to all those involved in personal injury litigation. As with previous editions, all judges involved in hearing personal injury cases will automatically receive a copy of the book. This eleventh edition has been fully updated to take account of inflation and decisions made in the two years since the previous edition and includes a foreword written by The Right Honourable Dame Janet Smith DBE.

To obtain parameters of injury severity, each LTI was measured in terms of the associated CP1-adjusted workers' compensation claim cost and the number of hours lost from work (duration). The data were obtained three years after the observational period, to improve the likelihood that the claims had been finalised. Aggregate level LTI data were obtained for all four groups. Individual-level data were also obtained for the Intervention Group and the Orderly Services Group, whether injured or not. These data included the age, gender, hours worked and work experience of the subjects. Also, where there was an LTI, it was determined whether or not the mechanism of injury was from manual handling. Using these data, two analytical approaches were then undertaken. Study 1 assessed the aggregate-level LTI data of the four groups. Study 2 evaluated individual-level data for the Intervention Group and the Orderly Services Group. The results demonstrate statistically significant post-intervention reductions in all measures of LTI occurrence for the Intervention Group.ion.

The purpose of the NEIP Claims Manual is to improve clarity of claims guidance to WYOs, vendors, adjusters, and examiners so that policyholders experience consistent and reliable service. The manual provides processes for handling claims from the notice of loss to final payment.

Introduction to Health and Safety at Workhas been developed for the NEBOSH National General Certificate in Occupational Safety and Health. Each element of the syllabus has a dedicated chapter and both taught units are covered in this book. A chapter on international aspects also makes this book suitable for the NEBOSH International General Certificate in Occupational Safety and Health. Previous editions of this book have been used for other NVQ level 3 and 4 courses in health and safety. Full colour pages and hundreds of illustrations bring health and safety to life. To make studying easier, each chapter starts with learning outcome summaries and ends with questions taken from recent NEBOSH examinations. Specimen answers and a study skills chapter aid exam preparation. As an introduction to all areas of occupational safety and health the book acts as a practical reference for managers and directors with health and safety responsibilities, and safety representatives. It covers the essential elements of health and safety management, the legal framework, risk assessment and control standards and includes handy forms and checklists. New in this edition: Updated throughout in line with changes in the regulations Learning outcomes now included at the beginning of each chapter Companion website with downloadable health and safety forms "Endorsed by NEBOSH" Student-friendly presentation in full colour, packed with illustrations and photographs "Revision questions and sample answers taken from recent NEBOSH examinations to test your knowledge" Includes a summary of the main legal requirements, ideal for both students and managers A free companion website is also available at: www.elsevierdirect.com/companions/9781856176882 and features: Editable health and safety forms Selected appendices sections in electronic format Phil HughesMBE, MSc, CFIOSH, is a former Chairman of NEBOSH (1995-2001), former President of IOSH (1990-1991) and runs his own consultancy. He received an MBE for services to health & safety and as a director of RoSPA, in the New Years Honours List 2005. Ed FerrettPhD, BSc (Hons Eng), CEng, MIMechE, MIET, CMIOSH, is a former Vice Chairman of NEBOSH (1999-2008) and a lecturer on NEBOSH courses at Cornwall Business School of Cornwall College. He is a Chartered Engineer and a health and safety consultant.
