It is the way in which a project management system operates as an entity in its environment that ultimately determines the success or failure of project management in the organization. Developing a concept of project management in systems terms requires that the project management system be viewed in as large a context as possible. This context of the "systems viewpoint" must be considered when project management is introduced into an organization.

**Project Management: A Systems Approach to Planning**

One key to getting and keeping the system perspective is to make sure that you truly understand the problem before defining the solution. One way to get this system view is to take a hierarchical approach to system development. By breaking the project down into pieces in a tree structure such as a work breakdown structure (WBS) can be useful.
