~~About scholarly communication | Scholarly Communication~~

Changing the Culture in Scholarly Communications “ All too often, leaders see cultural initiatives as a last resort, except for top-down exhortations to change... But cultural intervention can and should be an early priority—a way to clarify what your company is capable of, even as you refine your strategy. ”

~~Changing the Culture in Scholarly Communications—The ...~~

Scholarly communication covers a wide spectrum of activity, broadly in two areas – publishing and disseminating the results of research, and providing access to the published material. These activities have been the focus of much research in recent years, particularly in relation to academic journal articles and the movement for open access to journal articles, made possible by the increasing availability of content in electronic formats.

EVOLUTION OF THE SCHOLARLY COMMUNICATION LIFE CYCLE. In 2002, the United Nations International Scientific Information System (UNISIST) model of scientific and technical communication at last recognized the effect of the Internet and digital technologies on the exchange of scientific ideas (described by Söndergaard et al.). In the updated UNISIST life cycle for scholarly communication, primary communication flows from knowledge producers to knowledge users.
