Developed in cooperation between the New York State Department of Health (NYSDOH) and the Society of Cannabis Clinicians (SCC), this online CME-certified curriculum is designed to educate Practitioners who wish to register with the Department to certify patients for the medical use of marijuana under New York State's Compassionate Care!

The STABLE Program is a neonatal education program that focuses on the post-resuscitation/pre-transport stabilization care of sick newborns. This learner manual serves as a student handbook for either self-study or instructor-led presentations. It includes more than 220 pages, illustrated in full color.

Student manual for The S.T.A.B.L.E. Program Learner / Provider post-resuscitation / pre-transport neonatal stabilization course

Introductory section in the beginning of the manual provides detailed background information about the S.T.A.B.L.E. Program, testing, course renewal, and instructor classifications and qualifications. Case vignettes introduce each module and several case studies are provided for discussion. S.T.A.B.L.E. stands for the 6 assessment parameters covered in the program: Sugar, Temperature, Airway, Blood pressure, Lab work, and Emotional support for the family.

Vietnamese translation of the student manual for The S.T.A.B.L.E. Program Learner / Provider post-resuscitation / pre-transport neonatal stabilization course

Awarded 1st place in the American Medical Writer's Association 2004 Medical Books Competition, this Cardiac Module provides general guidelines for the assessment and stabilization of neonates with suspected congenital heart disease (CHD). Information is presented in a simplistic, yet very accurate, highly visual format. An optional CD ROM is available for purchase that demonstrates the blood flow pattern for the various structural heart lesions presented. This program targets the learning needs of physicians, nurses, respiratory therapists and others involved in the care of young infants with CHD. The first section of the book covers physical exam of infants with suspected CHD. The second section details the anatomic features, clinical presentation and initial stabilization of neonates with CHD. Specific heart lesions are covered in detail including those that are cyanotic ductal dependent, cyanotic non-ductal dependent, and left outflow tract obstructed ductal dependent lesions. The final section discusses modifications to the six S.T.A.B.L.E. (Sugar, Temperature, Airway, Blood pressure, Lab work, Emotional support) assessment components that are necessary when caring for infants with suspected or confirmed CHD. Prompt, effective, and appropriate care of these infants can reduce secondary organ damage, improve short and long-term outcomes, and reduce morbidity and mortality. This is a must-have, excellent resource that is also very useful for explaining cardiac lesions to parents!

Co-authored by an interprofessional collaborative team of physicians and nurses, Merenstein & Gardner's Handbook of Neonatal Intensive Care, 9th Edition is the leading resource for interprofessional, collaborative care of critically ill newborns. It offers comprehensive coverage with a unique interprofessional collaborative approach and a real-world perspective that make it a practical guide for both nurses and physicians. The new ninth edition features a wealth of expanded content on delivery-room care; new evidence-based care "bundles"; palliative care in the NICU; interprofessional collaborative care of parents with depression, grief, and complicated grief; and new pain assessment tools. Updated high-quality references have also been reintegrated into the book, making it easier for clinicians to locate research evidence and standards of care with minimal effort. These additions, along with updates throughout, ensure that clinicians are equipped with the very latest clinical care guidelines and practice recommendations (all in a practical quick-reference format for easy retrieval and review. UNIQUE! Core author team of two physicians and two nurses gives this internationally recognized reference a true interprofessional collaborative approach that is unmatched by any other resource. Consistent organization within clinical chapters include Physiology/Pathophysiology, Etiology, Prevention, Data Collection (History, Signs and Symptoms, and Laboratory Data), Treatment/Intervention, Complications, and Parent Teaching sections. UNIQUE! Color-highlighted point-of-care clinical content makes high-priority clinical content quick and easy to find. UNIQUE! Parent Teaching boxes outline the relevant information to be shared with a patient's caregivers. Critical Findings boxes outline symptoms and diagnostic findings that require immediate attention to help the provider prioritize assessment data and steps in initial care. Case studies demonstrate how to apply essential content to realistic clinical scenarios for application-based learning. NEW! Updated content throughout reflects the latest evidence-based practice, national and international guidelines, and current protocols for interprofessional collaborative practice in the NICU. NEW! Up-to-date, high-quality references are now reintegrated into the text for quick retrieval, making it easier for clinicians to locate research evidence and standards of care with minimal effort. NEW! Expanded content on delivery-room care includes the impact of staffing on quality of care, delayed cord clamping, resuscitation, and more. NEW! Coverage of the new evidence-based care "bundles" keeps clinicians up to date on new guidelines that have demonstrated improved outcomes of very preterm infants. NEW! Coverage of new pain assessment tools equips NICU providers with essential resources for maintaining patient comfort. NEW! Expanded coverage of palliative care in the NICU provides the tools needed to ensure patient comfort. NEW! Expanded coverage of interprofessional collaborative care of parents with depression, grief, and complicated grief prepares clinicians for this essential area of practice.

The STABLE Program is a neonatal education program that focuses on the post-resuscitation/pre-transport stabilization care of sick newborns. This instructor manual serves as the instructor's guide for the STABLE Program learner/provider course. It includes: how to set up a Learner course, tips for testing and teaching, and more.

The S.T.A.B.L.E. Program is a neonatal education program that focuses on the post-resuscitation/pre-transport stabilization care of sick newborns. This work allows you to interpret a neonatal blood gas result in seconds.

New 7th Edition! Powerful resource for interactive, simulation-based teaching and learning! The Neonatal Resuscitation Program (NRP) is an educational program jointly sponsored by the American Academy of Pediatrics (AAP) and the American Heart Association (AHA). The course is designed to teach an evidence-based approach to resuscitation of the newborn to hospital staff who care for newborns at the time of delivery. New in the 7th edition! Text updated to reflect the 2015 AAPI/AHA Guidelines for Cardiopulmonary Resuscitation and Emergency Cardiovascular Care of the Neonate Two new chapters added covering post-resuscitation care and preparing for resuscitation 140+ new full-color photographs replacing most line drawings

Environmental educators face a formidable challenge when they approach climate change due to the complexity of the science and of the political and cultural contexts in which people live. There is a clear consensus among climate scientists that climate change is already occurring as a result of human activities, but high levels of climate change awareness and growing levels of concern have not translated into meaningful action. Communicating Climate Change provides environmental educators with an understanding of how their audiences engage with climate change information as well as with concrete, empirically tested communication tools they can use to enhance their climate change program. Starting with the basics of climate science and climate change public opinion, Armstrong, Krasny, and Schuldt synthesize research from environmental psychology and climate change communication, weaving in examples of environmental education applications throughout this practical book. Each chapter covers a separate topic, from how environmental psychology explains the complex ways in which people interact with climate change information to communication strategies with a focus on framing, metaphors, and messengers. This broad set of topics will aid educators in formulating program language for their classrooms at all levels. Communicating Climate Change uses fictional vignettes of climate change education programs and true stories from climate change educators working in the field to illustrate the possibilities of applying research to practice. Armstrong et al, ably demonstrate that environmental education is an important player in fostering positive climate change dialogue and subsequent climate change action. An open access version of this book is available through Cornell Open.
