This article emphasizes on water purification methods and processes in the context of RO based packaged drinking water

Read Book Water Purification The Methods

manufacturing. Manufacturing process for packaged drinking water is essentially a purification process of raw water through different treatments in conformance with BIS standard IS 14543.

Water Purification Methods | Reverse Osmosis (RO) | RO ...
Distillation is a water purification method that utilizes heat to collect pure water in the form of vapor. This method is effective by the scientific fact that water has a lower boiling point than other contaminants and disease-causing elements found in water. Water is subjected to a heat source until it attains its boiling point.
